Proudly 100% Australian-owned  
and operated!

## SUPERIOR LOCKER SYSTEMS

### Mining Locker Systems

The Best Mine Locker System. That was the goal that North Country Steel aimed for when granted the opportunity to develop wire Mesh Lockers for our first Coal mine locker installation.

A solution was needed that would eliminate the safety risk of storage of clothes and equipment in overhead baskets. NCS consulted with the mines and recognised the need for fully ventilated wire mesh locker system with design differences between the clean and dirty side of a Bath House.

With continued client input and focus on continual improvement NCS have develop locker systems that are mine site specific and exceed all others in mine personnel suitability. Australian Underground and Open Cut miners deserve the best storage and security of their clothing and equipment whilst on the job. All wet gear from clothing to boots are able to dry fast preventing condensation or mould. Corrosion resistance is assured with lockers available in galvanised, powder coat or full stainless steel.

North Country Steel design, fabricate, deliver and install our Locker Systems.
